GTA 5 for Mobile is the same game as Grand Theft Auto released by Rockstar Games. It is the most complex and advanced version of the GTA franchise, set in a world a few years after the events that took place in Grand Theft Auto IV. Everything was improved compared to the earlier parts of mobile GTA series. Physics is now as realistic as it gets. Cars are not those bumpy things that you could see in the IV. Driving the car in GTA 5 Android seems like if you were racing. Shooting mechanics was also improved making it more real and impressive. Rockstar also changed the weapon select system and improved the melee fight style. The whole game is an incredible set of awesome mechanics that will make you want to spend 24 hours a day playing Grand theft auto Mobile. But that is what you expect

from a studio that stands behind Max Payne series, Midnight Club, Red Dead Redemption 2 and all the other great games on the market.
